

makeSEA + Catapult

The fastest way to organize and share your content as if you are together with your audience, in real life (using next-generation mixed reality).

It's time to change the way you think about communicating, teaching, and design. Time to change the way you capture and curate evolving ideas. Use makeSEA + Catapult for mixed reality and spatial collaboration to share your vision and inspire your audience with content that you create.

Catapult your vision, in real-time together, for FREE. It's as easy as a social media post:

1. Create an account on makeSEA.com, start a project and upload your content from most any content source.
2. Launch Catapult on your VR or XR compatible device.
3. Share and collaborate using your own spatial content, with others in real-time, remotely or in the same physical space.

Enabling augmented reality (AR), mixed reality (XR), and spatial computing for everyday use.
